Overall Work Plan

General Comments

We the residents on the Leeward Coast are very disappointed with ORTP 2040, we are at a critical point with our traffic situation in our community. When 2025 was the projected date we weren't that happy but it seemed doable. The HDOT will be trying a Contra- Flo Pilot Project some in 2017, but that is only a band-aid remedy, we need a permanent solution. We the residents asks that the OMPO Board / Committee assist us by finding any possible remedy for our traffic nightmare....Thank for allowing us to participate by creating this venue.....
